## Professional Summary

---

Hands-on Full-Stack Engineer and builder specializing in scalable, secure, and production-ready applications. Proven track record of improving backend response times by 40% and maintaining 99.9% system uptime in fast-paced environments. AI-fluent developer experienced in leveraging modern tools to accelerate feature delivery while maintaining strict code integrity and architectural standards.

## Education

---

**Royal Melbourne Institute of Technology**, Master of Information Technology August 2023 – July 2025

- GPA: 3.3/4.0
- **Coursework:** Cloud Computing, Artificial Intelligence, Software Engineering Project Management

**Guru Tegh Bahadur Institute of Technology**, Bachelor of Technology August 2018 – June 2022

- GPA: 9.23/10.0

## Experience

---

**Software Engineer**, Servosys Solutions - Noida, India February 2026 – Present

- Developing and maintaining enterprise banking solutions for the SBB at Axis Bank, delivering enhancements and technical support for customer-facing and internal banking portals.
- Designed and implemented OCR-based document processing solutions to automate data extraction, improve operational efficiency, and reduce manual verification efforts across banking workflows.
- Integrated cloud-based services using Amazon Web Services to enhance application scalability, performance, and system reliability, while collaborating with cross-functional teams for seamless deployment and support.

**Associate-Customer Support Analyst**, Tech Mahindra - Melbourne, VIC August 2025 – February 2026

- Managed customer order processing, tracking, and scheduling using Salesforce, Mobaxterm, ServiceNow, and internal support tools to ensure timely issue resolution and accurate order updates.
- Provided customer support by monitoring order status, coordinating with internal teams, and resolving service requests while maintaining high customer satisfaction and SLA compliance.
- Utilized CRM and ticketing systems to document customer interactions, troubleshoot order-related issues, and generate reports for tracking operational performance and delivery timelines.

**Software Engineer**, Fibreglass Transport Equipment PVT. LTD. - Melbourne, VIC March 2025 – Jun 2025

- Owned the end-to-end development of a rule-based CPQ system using TypeScript and Node.js, prioritizing clean code architecture and type safety for 200+ configurations.
- Acted as a foundational builder in a 5-member Agile team, managing features from initial customer pain point to production release.
- Optimized development velocity by integrating AI-assisted coding tools while ensuring 100% adherence to team linting and quality standards.

**Peer Mentor**, Royal Melbourne Institute of Technology – Melbourne, VIC March 2024 – July 2025

- Mentored undergraduate and postgraduate students to strengthen technical, academic, and professional skills, improving team performance and confidence.
- Conducted peer learning and knowledge-sharing sessions, fostering a culture of collaboration and continuous improvement within the student community.
- Provided personalized guidance and feedback, contributing to a 20% increase in mentee engagement and retention across mentoring initiatives.

**Software Engineer**, Servosys Solutions – Noida, India

November 2021 – May 2023

- Led development of enterprise-grade applications, improving scalability by 40% and reducing response times by 35% through microservices migration and API optimization.
- Strengthened application security by implementing AES encryption and Two-Factor Authentication, ensuring high-reliability for thousands of users.
- Managed full-lifecycle production deployments, utilizing automated testing (JUnit5) to eliminate vulnerabilities before release.

## Projects

---

### Cloud-Based Music Subscription App

AWS, Python, Ubuntu, Git

- Engineered a scalable music subscription web application featuring secure authentication and automated media processing workflows.
- Deployed and maintained the production environment using cloud-native services (AWS/Azure equivalent), ensuring 99.9% uptime and public accessibility
- Deployed the application on an Ubuntu EC2 instance with Nginx for secure, publicly accessible hosting.

### BroCode - Find study partners around the world!

JS, HTML, CSS, Django, SQL

- Engineered a global student collaboration platform using Django, JavaScript, and SQL, enabling real-time communication and secure user authentication for over 200+ active users during testing.
- Improved backend efficiency by reducing query response time by 35% through optimized Django ORM operations and database indexing.
- Delivered a responsive, cross-device UI that boosted user engagement by 40%, integrating RESTful APIs for dynamic data handling and smooth session management.
- Demo - <https://brocode-app-a7ad7894da36.herokuapp.com/>

## Technical Skills

---

**Frontend Development:** Angular, TypeScript, React, Next.js, HTML5, CSS.

**Backend Development:** .NET Core, C#, Spring Boot, Java, Node.js, RESTful APIs, Microservices.

**Cloud and DevOps:** Azure, AWS (EC2, S3, Lambda), Docker, Nginx, CI/CD, GitHub Actions.

**Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB.

**Quality and Tools:** Claude/AI-Assisted Dev, Jest, JUnit5, ESLint, Git, Jira, Agile.

## Certifications

---

University of Alberta Software Architecture and Design Patterns

EY- Microsoft AI Skills Passport

Stanford Machine Learning
